1. Glossary of Common Terms used in these Regulations

A **Programme** refers to the general type of course that students follow. These regulations cover the following programmes:

- Integrated Masters Degrees
- Integrated Masters Degrees with Foundation Year
- Integrated Masters Degrees with Placement Year/ Year in Industry
- Integrated Masters Degrees with Foundation Year and Placement Year/ Year in Industry

Year of Study corresponds to the Framework of Higher Education Qualifications and determines when a student is able to continue towards completion of their award. It may not align with the number of years the student has studied at the University. The Year of Study includes the assessment and reassessment periods of the academic year. For Full-time students, it is normally a 12-month period of enrolment and for Part-time students, it is a 24-month period of enrolment.

- As indicated by a student's programme of study, these regulations require students to continue through the following levels.
 - **Year 0** Foundation Entry is not covered by the FHEQ and therefore the reference point for this level is the Qualifications and Curriculum Authority's (QCA) National Qualifications Framework (NQF).
 - **Year 1** or [where it is desirable to indicate a link to the national framework] **Level [4]**. This level is the least advanced of all higher education levels, but more advanced than work typically undertaken before entry to higher education.
 - **Year 2** or [where it is desirable to indicate a link to the national framework] **Level [5]**.
 - **Year 3** or [where it is desirable to indicate a link to the national framework] **Level [6]**.
 - **Year 4** Masters Level, or [where it is desirable to indicate a link to the national framework] **Level [7]**.

An **Award** refers to ***the type of certification students receive on completion of their course***

For example

- Master of Electronic and Computer Engineering with Honours.
- There are intermediate awards available to students who do not complete their course.
- Section 9 explains the full set of awards available to students governed by these regulations.

Recommendations shall normally be based on the Overall Aggregate, combining marks from Year 2 [weighted 25%], Year 3 [weighted 25%] & Year 4 [weighted 50%];

The lower Overall Aggregate shall be ignored. The overall average will be rounded to the nearest whole number (decimal places up to four are rounded down, decimal places of five or more are rounded up). A student's degree will then be classified based on an initial assessment of whether their rounded aggregate determined as detailed in 8.8 of these regulations falls within the following categories:

Where the overall aggregate falls within two rounded marks of the classification borderline the student's profile will be scrutinised further at the examination board. Such borderline candidates will have their Year 4 profile considered in more detail before confirming their overall degree classification. The higher classification will be awarded if the Year 4 profile confirms that the student achieved, on initial assessment, a minimum of 60 credits approved for that award at the higher classification.
