

EDUCATION LEADERSHIP & MANAGEMENT II: WORKING EFFECTIVELY WITH OTHERS

Duration: 4 months | Delivery: Online | Start date: January 2024

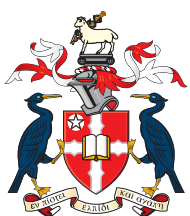

This module takes as its focus the need for all those working within schools and other education institutions to develop positive and productive relationships with others. Leadership and management do not occur in a vacuum, and this module has been designed to develop both functional knowledge and critical understanding of a number of key perspectives on human behaviour within organisations and on the nature and processes of organising human activity. As such, it is designed not only to encourage the development of solutions to specific leadership and management problems, but also to provide participants with insights into the complex nature of organisations and of organisational life.

Module Overview

The module content has been collated around three themes:

- Perspectives on People – looking at individual differences affecting orientation to work (culture, motivation, psychological contract etc.).
- Perspectives on Organising – which looks at the broader organisational context within which people work focusing on topics such as understanding education organisations, , working in teams and groups, job/role design.
- Strategies for Working Effectively - which encompasses topics such as communication, managing conflict and ethical leadership considerations.
