

MA Education

Programme Overview

The postgraduate programme in Education is designed for teachers, educators, trainers and others with a personal or professional interest in the field of education. The programme offers an opportunity for engagement with the key theories, concepts and ideas in education.

Emphasising both the theoretical foundations and practical applications of pedagogical approaches, the course will provide opportunities for engagement with the key theories, concepts and ideas in learning, teaching, assessment and/or curriculum development and delivery. The structure of the programme is flexible enough to meet the needs of those seeking to develop a more academic understanding of the field and those aspiring to develop their practice through critical reflection. The programme will help practitioners to adopt best practice and promote innovation in educational practice.

Why choose Liverpool Hope?

Liverpool Hope University is an excellent choice for postgraduate study in Education, combining a rich teaching heritage with a modern, research-informed approach. With small class sizes, personalized support, and a wide range of specialisms, the university offers a tailored learning experience that aligns with your career aspirations. You'll benefit from strong links to the education sector, enhancing your employability and professional networks, while studying in a vibrant, welcoming campus environment. Located in the culturally rich city of Liverpool, the university also provides flexible study options and dedicated support to help you excel academically and professionally.

Curriculum

The full masters programme (180 credits) will include the study of the following modules:

Module 1. Critical and Contemporary Issues in Education (30 credits):

The module will explore the multifaceted landscape of education, focusing on critical and contemporary issues that shape the field in the 21st century. Through an interdisciplinary lens, you will engage in deep discussions and critical analyses to develop a nuanced understanding of the education landscape. Some of the content students are likely to encounter in this course would include: examination of the influence of globalisation and current educational policies on various stakeholders in education, and the integration of technology in education, considering its impact on learners and learning environments. As the focus of the course is on contemporary issues the content of the course will evolve depending on the societal issues of prominence and significance for education at the time of teaching the course.

Module 2. Learning, Teaching and Assessment (30 credits):

This module aims to develop participants' understanding of a range of learning, teaching and assessment strategies which promote learners' progress in order that all can achieve their full potential. They will be helped to develop self-direction and originality in problem-solving in relation to the module content, and act autonomously in planning and implementing change in their educational setting, taking account of current thinking and literature in related areas.

Module 3. Curriculum Theory and Development (30 credits):

This module explores the foundational questions regarding what a curriculum is and how we can conceptualise and understand a curriculum. It

examines theoretical models of the curriculum, teacher agency in relation to curriculum and the epistemological, political and moral dimensions of curricula. It also develops approaches for the formation, development, assessment, evaluation and critical analysis of curricula.

Module 4. Free choice Module (30 credits):

Depending on whether you start the course in October or February you would have a free choice module which you could select from the modules available that semester. Depending on the module you choose to study, content covered could vary. Please note some modules may have specific entry requirements. The current offer includes modules covering aspects of Special Education Needs or Disability Studies; Advanced Mentoring and Coaching; Early Childhood; or Education Leadership and Management. However, for full time students owing to timetabling constraints some of the options might not be available.

Module 5. Dissertation in Education (60 credits):

You will consolidate the knowledge of your chosen disciplinary area in this module. In doing so you would draw on the knowledge of the different modules you have studied in this course, including the free choice 30 credit module, encouraging interdisciplinary work. With support from a supervisor, it is anticipated you will conceive, develop and complete a high-quality proposal followed by a dissertation within the field of education and aligned to the subject specialism you have opted to study. Emphasizing both theoretical foundations and practical application, the dissertation phase will equip you with the necessary skills to engage in rigorous educational research and contribute meaningfully to the academic discourse.

Teaching and Research

The structure of the programme is flexible both in content and delivery. Classes typically run in the evenings and weekends and you can join the course either in October or February. The number of classes and days you attend classes will vary depending on whether you choose to do the course full time or part time and your choice of the free choice module. Whilst the modules you would undertake as part of the PGCert are fixed you have some flexibility in the content you undertake as part of the Masters and the PGDip - one of the modules you study as part of the masters/PGDip can be a free choice from the modules running that term.

All our programmes are taught by tutors who actively research in the field. You will find that your postgraduate degree in the Faculty of Education and Social Sciences will align with one or more of the research groups/centres within the faculty.

Future Career Opportunities

You would be able to structure your award to enhance your personal interests, career opportunities and potential for promotion. The programme will enable you to undertake further research to enhance your current professional practice. Students completing this master's would be well placed to go on to do a doctorate (EdD or PhD) at Liverpool Hope University subject to meeting the entry criteria.

Please note - this course does not offer you a teaching qualification to teach in British schools but is an academic study of Education.
